

What is InHMH?

Highlight of the product

InHMH: **Intelligent Hotel Manager Helper**, is a software can help hotel managers In various ways.

About the product:

This is a software for managers who work in hotels crossing the countries: region managers, general managers and different department managers.

Different kinds of users will login this system with different user names, so they only use one specific aspect of InHMH.

*- **Region managers** can have a global view of business condition in one region. He can also see regional business difference via InHMH.*

*- **General managers** are responsible for one hotel, so he can have a global view of one hotel.*

*- **Department managers** will find it more efficient to handle department affairs by InHMH. It will also be more convenient for them to collaborate with colleagues of other departments.*

Also, InHMH will make it easy for staff to understand missions and work efficiently.

List up your software's killer feature.

1 Effective sales analysis to support sales strategy.

- Sales department manager can intuitively know which product is more popular by analyzing product categorized Sales Reports.

- All the sale reports support query by year, quarter, month or week, which gives you both long term and short term views.

2 Effective extension of hotel's business

- InHMH will record customer information, and help you identify potential VIP customers by their consumption.

- Sales department can release promotion and other advertisements to target customers easily.

3 Improve cross-department work efficiency

This system enables you to make requests to other departments. For example, when cleaning rooms, if the staff finds facilities are damaged, Housekeeping Department Manager can request Engineering Department to Maintain instead of communicating with Engineering Department Manager directly.

4 Arrange tasks in a more intelligent way

Managers can make some rules of arranging tasks. For example, Engineering Department Manager can make such rule: when getting a air-condition repair quest, notify air-condition mechanic to work, and InHMH will send message to the staff. Managers can get themselves out of such tiresome work arrangement.

5 Easy for Region managers to grasp regional business performance

- Region managers can inquire some high level business reports of the region like sales amount, revenue amount and benefit amount reports. Managers just select the time interval and report type, InHMH will automatically generate reports according to database.

- InHMH supports plots histogram and line figures which provides a more intuitive show.

- InHMH supports query by city, which enables managers to know business performance difference among cities.

6 *Provide all-round information for General manager*

General managers can inquire business reports of his hotel. They can get sales amount, revenue amount and benefit amount reports during a week, month or year.
